SECTION II - CODING FOR ITEM 10B OF DD FORM 350 (SYSTEM OR EQUIPMENT)

Purpose. The DD Form 350 codes in this Section II have been developed to facilitate analysis of DoD procurement by major weapon system, equipment or item. Only production items are covered by this coding system: RDTE work is excluded since it is covered by Section I, Part A of this manual. In addition to RDTE, codes in this section are not applicable to Construction, Subsistence, Clothing/Textiles or Petroleum. Codes generally have been assigned to all production items whose annual programmed procurement is \$2,000,000 or more. Accordingly, if an end item or a component identifiable to an end item cannot be identified with a specific code, a request for a code together with the applicable DD Form 350 should be addressed to the appropriate organization specified in ASPR 21-103(b). Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

Description and Use. The DD Form 350 code, consisting of three alphabetical digits, is shown in the first column of Section II. The first digit identifies one of the following major categories of equipment:

A. Aircraft

E. Weapons

B. Aircraft Engines

F. Ammunition

C. Missiles & Rockets

G. Electronics

D. Vehicles

H. Other Equipment

S. Ships

The second digit identifies a subdivision of the major category, e.g., Fighter Aircraft, and the third digit identifies the specific item, e.g., F-111.

Normally each system or equipment code shall include all subsystems, components, repair parts, modifications, repairs and related supplies and services (other than RDTE and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines. If a procurement is for components, parts, or services covering more than one system or equipment, but 75% or more of the dollar amount is allocable to a single system or equipment, the code of that system or equipment shall be assigned. Otherwise, multi-system procurements shall not be assigned a specific code.

Each Department shall use <u>only</u> that part of Section II designated for it, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

- l. Aircraft by design number within each basic mission symbol, e.g., A-4, A-5, $\overline{A-6}$, $\overline{F-4}$.
 - 2. Aircraft Engines by design number within type of engine.
 - 3. Missiles and Rockets by design number.

(Note: If an aircraft, missile or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in the Manual but agrees as to design number, the code applicable to that design number shall be assigned. For example, an RB-52 Aircraft would be assigned the code for B-52. The series symbol for an item is not used; e.g., F-lll is used rather than F-lllA or F-lllB.)

- 4. Air Force Electronics and Communications numerically by system number.
- 5. All Other Categories alphabetically by key word or words and by size of caliber.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeros) shall be assigned.

WEAPON SYSTEM

An instrument of combat with all related equipment, operating skills, and direct supporting facilities and services required to enable the instrument of combat to operate as a single unit of striking power.
